

IN THE CLAIMS

Claim 1 (currently amended): A hat comprising:
a crown including an outer peripheral surface, ~~and~~
a first flap including an inner peripheral surface and an outer
peripheral surface, and including an edge portion attached to said
outer peripheral surface of said crown with ~~an attaching a securing~~
line, ~~and~~

said first flap being foldable relative to said crown to have
either of said inner peripheral surface or said outer peripheral
surface of said first flap to be selectively engaged onto said outer
peripheral surface of said crown or to be exposed outwardly,

a second flap including an inner peripheral surface and an outer
peripheral surface, and including an edge portion attached to said
outer peripheral surface of said crown with a securing line, said
second flap being foldable relative to said crown to have either of
said inner peripheral surface or said outer peripheral surface of said
second flap to be selectively engaged onto said outer peripheral
surface of said crown or to be exposed outwardly, and

a third flap including an inner peripheral surface and an outer
peripheral surface, and including an edge portion attached to said
outer peripheral surface of said crown with a securing line, said
third flap being foldable relative to said crown to have either of said
inner peripheral surface or said outer peripheral surface of said third
flap to be selectively engaged onto said outer peripheral surface of
said crown or to be exposed outwardly.

Claim 2 (canceled).

Claim 3 (currently amended): The hat as claimed in claim 2, wherein said ~~attaching~~ securing line of said second flap is partially ~~superposed with said~~ attaching secured to said securing line of said first flap.

Claim 4 (currently amended): The hat as claimed in claim 2, wherein said outer peripheral surface of said second flap is engageable onto said inner peripheral surface of said first flap when said second flap is folded relative to said first flap.

Claim 5 (canceled).

Claim 6 (currently amended): The hat as claimed in claim 5, wherein said ~~attaching~~ securing line of said third flap is partially ~~superposed with said~~ attaching secured to said securing lines of said first and said second flaps.
